## QUALITY CENTER

Optimizing the quality, performance, availability, and integrity of applications has become critical to the viability of your enterprise. Why? Because the business risk of application failure has never been higher than now. Applications have become the lifeblood that automate almost every core process within global businesses and governments.

Leading IT professionals rely on Mercury BTO Enterprise™ to ensure their critical applications are ready to deliver intended business outcomes before going live. Mercury BTO Enterprise is the industry's first software and services suite that reduces the risk, cost, and time to business outcomes of IT.

### Mercury BTO Enterprise impacts:

- Application failure risk.
- Risks and costs of delivering business results with custom and packaged applications.
- The business value delivered from your portfolio of IT initiatives.
- Effective change control and configuration management.

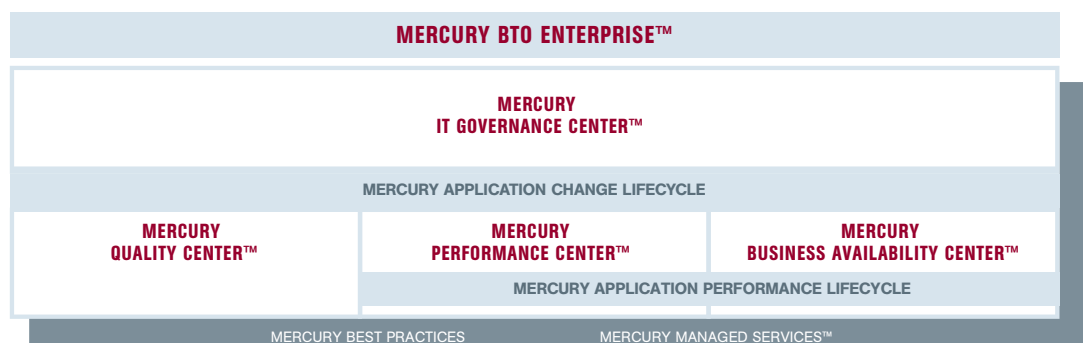

### MERCURY QUALITY CENTER

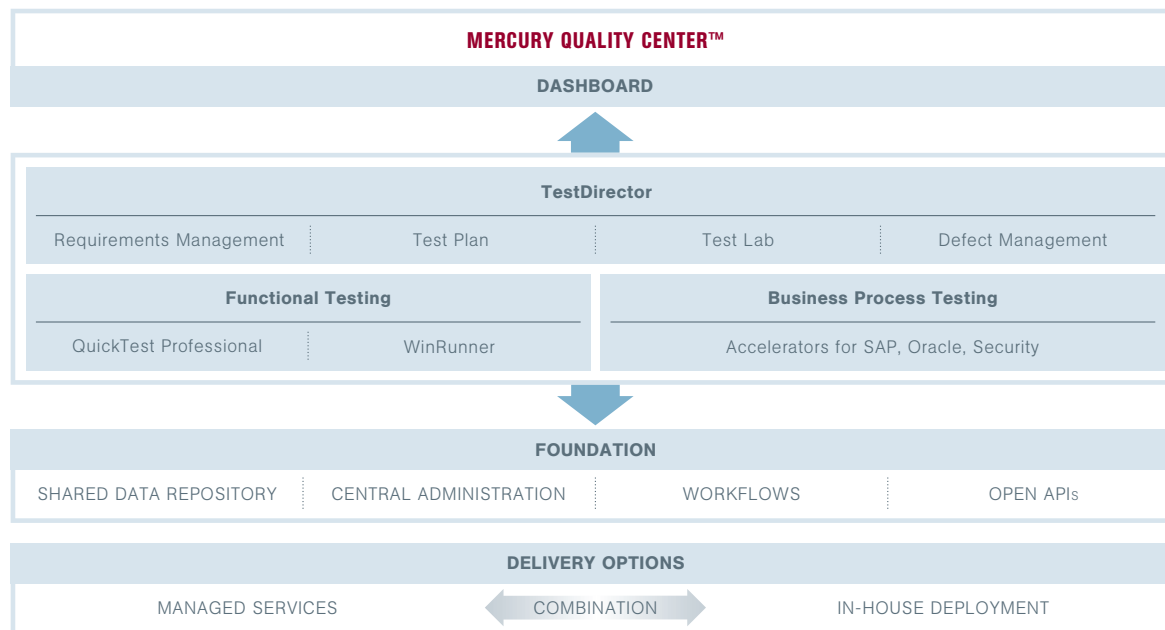

A strategic part of Mercury BTO Enterprise, Mercury Quality Center™ is the industry's leading functional testing software suite. It reduces the time and cost required to deliver new applications and services into production by automating, controlling, and enforcing your quality standards. With Mercury Quality Center, you can automate end-to-end quality management processes, the testing of strategic functionality, and the management reporting required to ensure the integrity of custom and packaged applications.

It allows interdisciplinary QA, development, and business analyst teams to share best practices, collaborate, and accelerate time to market. Mercury's dashboard technology and deep process management gives you visibility into where a project stands across all teams, including outsourced and systems integration partners. This enables you to ensure that applications produce their intended business outcomes.

### With Mercury Quality Center, you can:

- Manage complex testing projects from a centralized location to improve quality and reliability.
- Standardize and manage the entire quality process to make better go-live decisions.

### MERCURY QUALITY CENTER OFFERINGS

Mercury Quality Center offerings provide the first business-centric, lifecycle approach to optimizing quality during pre-production. Mercury Quality Center includes industry-leading products such as:

**Mercury Quality Center Dashboard™** provides a web-based platform that enables you to track application readiness in real-time and manage project risks. It offers 24 out-of-the-box quality KPIs and the ability to create custom KPIs.

**Mercury TestDirector®** offers a consistent, repeatable process and support for gathering requirements, planning and scheduling tests, analyzing results, and managing defects. This industry-standard quality and test management tool offers integration between Mercury Quality Center and Mercury IT Governance Center™.

**Mercury QuickTest Professional™** provides the industry's best solution for functional test and regression test automation – addressing every major software application and environment.

**Mercury WinRunner®** captures, verifies, and replays user interactions automatically, so you can identify defects and ensure that business processes work flawlessly upon deployment and remain reliable.

**Mercury Business Process Testing™** extends automated user acceptance testing to line of business (LOB) and key stakeholders accountable for the business outcome of application initiatives. Mercury Business Process Testing also supports existing Mercury QuickTest Professional and Mercury WinRunner customers.

**Mercury Quality Center Services** provides a wide range of services to lead and support you through your implementation, including Mercury Managed Services for Quality Center™, Mercury Custom Consulting Service™, and Mercury Functional Testing Automation Service™.

### WHY MERCURY

Mercury is the world leader in application delivery, with 58.8-percent market share in automated software quality and performance testing products. Mercury has embedded Mercury Quality Center with best practices gained from working with more clients in more distributed environments than any other software company in the world. With Mercury Quality Center, the quality testing cycle can begin even before coding is complete, shortening release schedules while ensuring the highest level of business results from new application functionality.
