

Paid Intern: Part/Full time – Fashion Industry Retail Sales Analytics

September 26, 2011

Data Analysis including Quality Assurance

You will be working within a fashion analytics software development organization by assisting the analytics account team to deliver and administer business intelligence information with our clients. Our clients are leaders in the design, construction and delivery of fashion garments and accessories in the luxury market. You will see first-hand how leading apparel firms today measure success of design, merchandising and sales efforts, as well as learn how the tools and processes are involved in capturing and communicating timely sales and inventory metrics.

Qualifications for this position

The ideal candidate for this position is a college junior/senior year of college with above average Excel skills and interested in understanding retail merchandising analysis. Superior verbal and written communication skills are important as well as the capacity to work in a team environment. You must be available in New York City on Mondays and Tuesdays most of the day with flexible hours during the balance of the week.

What is in it for you?

In addition to your compensation, you will gain knowledge from managers and VP's with 20+ solid years in the field working with a rapidly growing fashion analytics company who is a vital part in the industry. You will work in a company that truly values each employee and proves it by offering opportunities to grow internally by adding new skills and knowledge.
